INTERIM FINANCIAL REPORT For the six months ended 30 September 2019

The directors present their unaudited interim report for the period ended 30 September 2019.

Review of the business and principal activity

From the commencement of trading on 1 February 2001, the principal activity of the company has been the provision of financing facilities to Birmingham Airport Holdings Limited (the ultimate holding company of Birmingham Airport (Finance) plc) and group companies. The company has a 20 year £105 million corporate bond issued in 2001 and Private Placement Senior Notes, issued in 2013, for £30 million and £45 million with terms of 10 years and 15 years respectively. The net proceeds for this transaction have been lent to Birmingham Airport Holdings Limited (£32.2 million) and Birmingham Airport Limited (£41.8 million), both at a commercial rate of interest. During March 2016 the company entered into Private Placement Senior Notes agreements for £76 million with a term of 25 years. The proceeds for this transaction have been lent to Birmingham Airport Operations Limited on 6 April 2016 at a commercial rate of interest. During January 2019, the company entered into Private Placement Senior Notes agreements for £90 million with a term of 30 years. The proceeds for this transaction have been lent to Birmingham Airport Limited on 24 January at a commercial rate of interest.

Principal risks and uncertainties

The company is risk averse in its principal activities as detailed above. The principal risk is interest rates. The company has limited exposure, as both the corporate bond and private placement senior notes have fixed interest rates. The amounts owed by group undertakings attract interest at a rate composed of interest rates payable plus 0.5 per cent.

1. Accounting Policies

Basis of Preparation

The interim financial report has been prepared on a going concern basis under the historical cost convention and in accordance with 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' 102 (FRS 102) and with the Companies Act 2006. The principal accounting policies, which have been applied consistently throughout the period are set out below.

These condensed interim financial statements for the six months ended 30 September 2019 have been prepared in accordance with the Disclosure and Transparency Rules of the Financial Conduct Authority.

The condensed interim financial statements should be read in conjunction with the annual financial statements for the year ended 31 March 2019, which have been prepared in accordance with UK GAAP in force at that time.

Summary of disclosure exemptions

FRS 102 allows a qualifying entity certain disclosure exemptions; these disclosures are included in the 2018/19 consolidated financial statements of Birmingham Airport Holdings Limited. The company has taken advantage of the following exemptions;

- the requirement to prepare a statement of cash flows (FRS 102 para 1.12(b));
- the non-disclosure of key management personnel compensation in total (FRS 102 para 33.7); and
- the requirement to complete a reconciliation of the number of shares outstanding at the beginning and end of the period (FRS 102 para 4.12(a)(iv)).

The company notified and did not receive any objections to the use of the above exemptions by its shareholders.

Related parties

The company is exempt under the terms of FRS102 from disclosing related party transactions with entities that are wholly owned by Birmingham Airport Holdings Limited.

Taxation

The tax expense for the period comprises current tax. Tax is recognised in the income statement, except that a change attributable to an item of income or expense recognised as other comprehensive income is also recognised directly in other comprehensive income.

The current income tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the reporting date in the countries where the company operates and generates taxable income. Current tax assets and liabilities are not discounted.

Share capital

Ordinary shares are classified as equity. Equity instruments are measured at the fair value of the cash or other resources received or receivable, net of the direct costs of issuing the equity instruments. If payment is deferred and the time value of money is material, the initial measurement is on a present value basis.

Dividends

Dividend distribution to the company's shareholders is recognised as a liability in the financial statements in the reporting period in which the dividends are approved by the company's shareholders.

Financial instruments

Basic financial assets including accounts receivable are initially recognised at transaction price then subsequently carried at amortised cost using the effective interest method.

Basic financial liabilities, including trade and other payables and loans that are classified as debt, are initially recognised at transaction price.

Interest-bearing borrowings are initially recorded at fair value, net of transaction costs.

1. Accounting Policies (continued)

Interest-bearing borrowings are subsequently carried at amortised cost, with the difference between the proceeds, net of transaction costs, and the amount due on redemption being recognised as a charge to the Income Statement over the period of the relevant borrowing.

The company assesses at the end of each period whether there is objective evidence that a financial asset is impaired. A financial asset is impaired and impairment losses incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset that can be reliably estimated.
